RE: Disposal/Transfer of Miscellaneous Chemical Materials Located in the E & E Warehouse

Dear Mr. Rodin:

A list of all known chemical waste currently located at E & E's warehouse is enclosed. The list includes materials the EPA CID asked E & E to retain pending further legal action, materials recovered from minor containment sites (typically methamphetamine laboratories), waste sample materials remaining from field screening, and containers of unknown origin.

If you have any questions or comments, please contact me at (206) 624-9537.

Sincerely,

Jeffrey Fowlow
START Project Leader

Enclosure
